

Eco-Clear Three-Way Valve

Instructions for Installation • Operation

This three-way valve is used to control the water flow coming from your pump to:

- 1) control the flow of water to your filter
or
- 2) feed two water features.

Features

- Step barb inlet fitting for 1 $\frac{1}{4}$ ", 1 $\frac{1}{2}$ " or 2" incoming water
- Step barb outlet fittings for use with 1", 1 $\frac{1}{4}$ " or 1 $\frac{1}{2}$ " kink free tubing
- Easy-turn handles
- Ball valves for effective flow control

General Installation Tips

Maximum performance is achieved when used with largest outlets and tubing sizes available. Restricting water flow with small accessories will reduce the performance of the pump.

1. Select the step barb fitting based on type of tubing being used.
2. When using the step barb fitting, use a hacksaw to remove any smaller steps than the tubing being used as shown in the photos below.
3. Be sure rubber gaskets are in place inside barbed fittings before installing on valve body.
4. Attach the appropriate tubing to the barb fittings and secure with clamps. (clamps not included)
5. Open the desired valve(s) for operation

PVC Installation Tips

Valve body may be used with SCH 40 PVC fittings (sold separately) for use with flexible PVC pipe. Use 2" female adapter on inlet and 1.5" female adapters on outlets as shown in photo.

- Wrap valve body threads with Teflon Tape before installing female adapters.
- Do not overtighten

Winterization/Storage

When the Three-Way Valve is out of use for extended time - wash and dry it then store indoors in a non-freezing location. Valves damaged by freezing are not covered under the limited warranty.
